

Invitae Genetic Testing Guidance for Clinicians

- Go to <https://www.invitae.com/us/providers/test-catalog> to search for a specific condition, gene, or panel.
- Print appropriate Invitae test requisition from sidebar of NCH Test Catalog under “Test Requisition.” Use “Neurodevelopmental Disorders Test Req.” for evaluation of neurodevelopmental delay. Use “Invitae_FVT_VUS_OrderForm” for all other genetic testing. **All Invitae genetic test orders must include a paper test requisition.**
- Complete the test requisition in its entirety, being sure to include the test code(s) from the Invitae test catalog.
Fax completed test requisition to NCH Lab at 802-334-3230.
- Order **“Bill Only Invitae Collection NCTY”** in Cerner. This alerts the phlebotomist that an Invitae requisition is on file, and a kit needs to be collected.
